Communication System Failure	Information Systems	4-1002

### UMMC R.A.C.E. PROCEDURES

In case of fire, staff will follow the steps established by the **R.A.C.E.** system:

**Remove** any person in immediate danger from room where fire is located.

**Alert** other staff members to the problem. Make sure that the alarm is transmitted by dialing 4-6666 and pulling a manual fire alarm pull station.

**Confine** the fire to the room of origin by closing the door after making sure all persons are safely out of the room. Close all other doors in the area to prevent the spread of fire and smoke into unaffected spaces in that area.

**Extinguish** the fire if at all possible. Do not put yourself in unnecessary danger in attempting to do so.
